GOLDMAN SACHS – FORAGE JOB SIMULATION

Internal Audit Job Simulation

An Academic Internship / Job Simulation Presentation

COMPLETION PERIOD

September 2026

STUDENT CREDENTIALS

STUDENT CREDENTIALS

Sarthak Shubham

Roll No.: 25SCS1003002959

B.Tech (Computer Science & Engineering) • 2025–2029

IILM University, Greater Noida, U.P.

Goldman Sachs
Internal Audit Job Simulation

Candidate & Program Overview

Candidate Details

Student Name: Sarthak Shubham
Roll Number: 25SCS1003002959
Degree: B.Tech (Computer Science & Engineering)
Academic Batch: 2025–2029
University: IILM University, Greater Noida, U.P.

Simulation Profile

Program: Goldman Sachs – Internal Audit Job Simulation
Platform: Forage
Domain: Internal Audit, Risk & Financial Operations
Completion Period: September 2026
Credential: Certificate of Completion

Organization & Simulation Profile

Goldman Sachs

The simulation places the learner in the context of a leading global investment bank and introduces the role internal auditors play in supporting financial stability, risk management and sound business processes.

- Focus on curiosity, collaboration and client impact
- Exposure to accounting and financial operations

Forage Job Simulation

Forage provides a risk-free environment to experience realistic work tasks. The program combines guided learning with practical exercises, allowing students to apply professional reasoning without claiming employment at Goldman Sachs.

- Practical tasks rather than only theoretical study
- Emphasis on risk awareness and control thinking

Problem Statement & Industry Context

The Industry Challenge

Large financial institutions operate through complex processes and controls. Weak controls can create financial, operational, regulatory and reputational risks. Internal audit helps identify such weaknesses and provides independent insight into whether controls are working as intended.

Simulation Scope

The job simulation translates this challenge into realistic audit scenarios. The learner reviews observations, identifies risks and control gaps, considers business and client impact, and recommends practical improvements.

Core Learning Objectives

Build a Risk Mindset

Recognize risks before they become larger business problems.

Understand Internal Audit

Learn how audit supports controls, governance and financial stability.

Assess Control Weaknesses

Connect audit observations with process gaps and their consequences.

Recommend Improvements

Propose practical actions that reduce risk and improve outcomes.

Methods, Evidence & Analytical Skills

Risk Assessment

Probability + impact
thinking to prioritize risks.

Control Analysis

Identify where a process or
control can fail.

Scenario Analysis

Interpret audit observations
in a banking context.

Recommendation

Suggest specific, practical
control improvements.

Work products: Personal Finance Risk Assessment (Excel) + Internal Audit Scenario Responses (Word)

Internal Audit Risk-Assessment Workflow

1 Understand the process

What is the process supposed to achieve?

2 Identify the risk

What could go wrong and why?

3 Assess impact

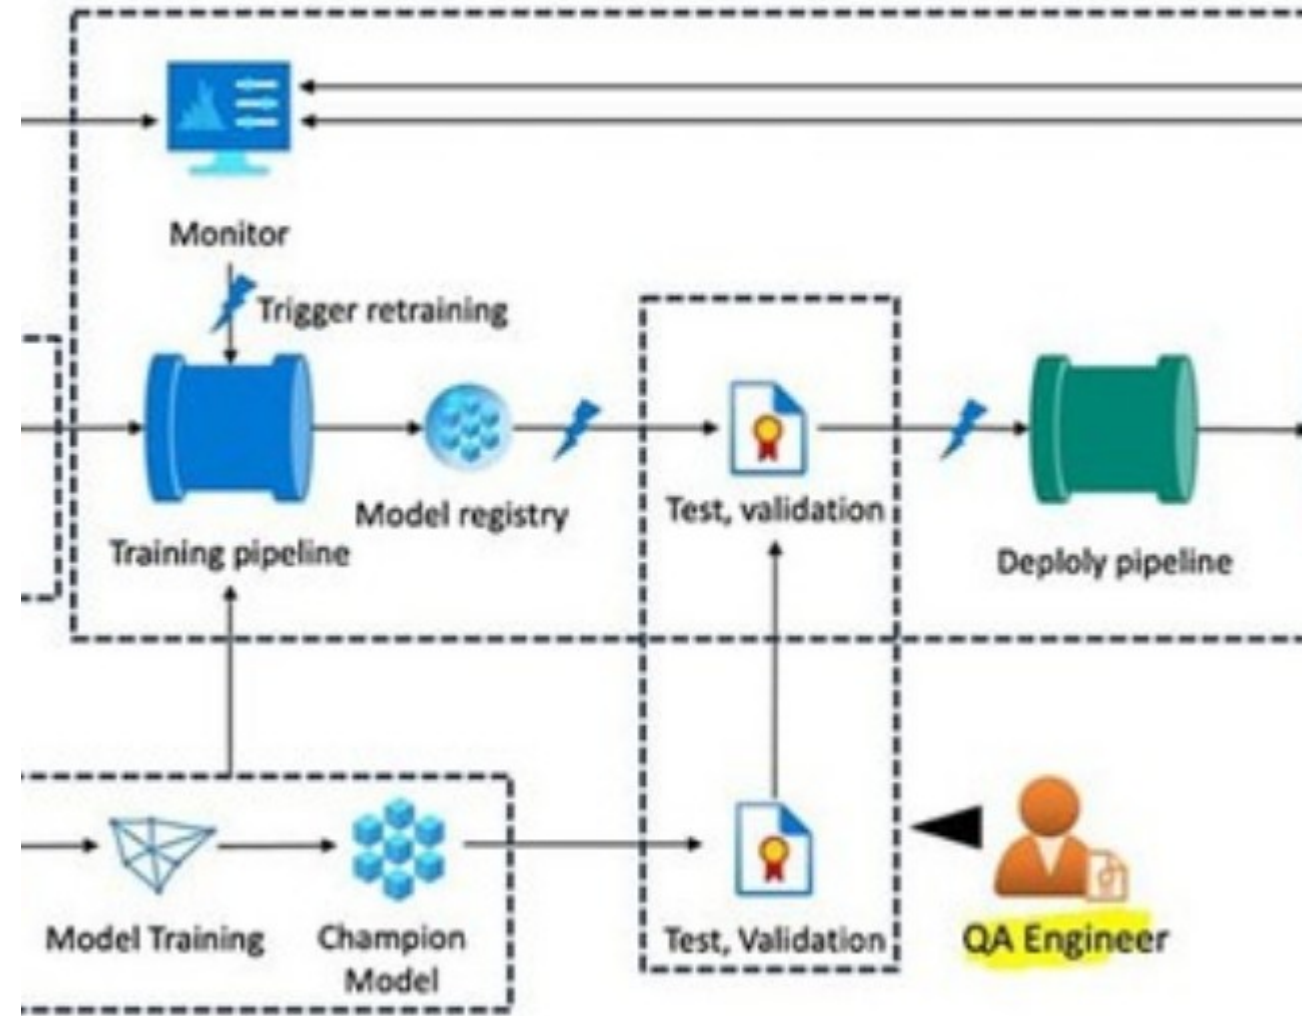

Who or what could be affected?

4 Evaluate the control

Is the existing control sufficient?

5 Recommend action

What practical change can reduce the risk?

Task Timeline & Activities

Task 1

Foundations of Internal Audit

Learned audit fundamentals and applied risk management to a personal-finance exercise.

Task 2

Risk Assessment in Global Banking & Markets

Reviewed three audit scenarios and identified risks, control gaps and improvement actions.

Task 2 – Global Banking & Markets Scenarios

01

Trade Execution

Execution delays created financial and operational impact. The response considered both Technology Audit and Business Audit perspectives.

02

Credit Risk / NPLs

Strengthen ongoing credit monitoring and periodic borrower reassessment to identify deterioration earlier.

03

AML Transaction Monitoring

Low reporting of identified suspicious transactions indicated an escalation/control gap requiring stronger review and automation.

Key Work Completed & Demonstrated Skills

Personal Risk Assessment

Built a structured risk assessment for managing personal finances as a student, using probability, impact, risk rating and controls.

Trade Execution Analysis

Linked slow execution to financial loss, operational discrepancies and client experience, while recognizing the technology/business audit overlap.

Credit Risk Analysis

Recommended stronger post-approval monitoring and periodic reassessment to catch early warning signs before loans become non-performing.

AML Control Improvement

Identified the gap between suspicious-transaction detection and reporting and proposed mandatory review plus automated escalation.

Professional Documentation

Converted observations into concise, evidence-based explanations and actionable recommendations.

Certification & Official Verification

Verification Item	Details
Program	Goldman Sachs – Internal Audit Job Simulation
Platform	Forage
Participant	Sarthak Shubham
Completion	Certificate of Completion — September 10, 2026
Practical Tasks	Foundations of Internal Audit; Risk Assessment in Global Banking & Markets

Credential evidence is reproduced on the following slide.

Certificate of Completion

**Goldman
Sachs**

Inspiring and
empowering
future professionals

Sarthak Shubham **Internal Audit Job Simulation**

Certificate of Completion
September 10th, 2026

Over the period of September 2026, Sarthak Shubham has completed practical tasks in:

Foundations of Internal Audit
Risk Assessment in Global Banking & Markets

A handwritten signature in black ink, appearing to read "Tom Brunskill".

Tom Brunskill
Co-Founder of Forage

Thank You!
